January 2011 Census Shows 11.4 Million People Covered by Health Savings Account/ High-Deductible Health Plans (HSA/HDHPs)

June 2011

Table 4 has been revised since the report's original release on June 14, 2011.

SUMMARY

An annual census by America's Health Insurance Plans (AHIP) of U.S. health insurance carriers shows that the number of people covered by health savings account/high-deductible health plans (HSA/HDHPs) totaled 11.4 million in January 2011. As in previous years, AHIP received participation from virtually all private health insurance carriers in the HSA/HDHP market for this census. This census does not include coverage associated with health reimbursement arrangements (HRAs), which are most commonly offered in the large-group market.

HIGHLIGHTS OF THE 2011 CENSUS

Enrollment trends:

- The number of people with HSA/HDHP coverage rose to more than 11.4 in January 2011, up from 10.0 million in January 2010, 8.0 million in January 2009, and 6.1 million in January 2008.
- Overall, enrollment in HSA/HDHP coverage in the group market rose to 9.1 million in January 2011, up from 8.0 million in January 2010.
- Enrollment in the individual market rose to 2.4 million covered lives in January 2011, up from 2.1 million in January 2010.
- Gender distribution of lives covered by an HSA/HDHP as of January 2011 was 51 percent male and 49 percent female.
- Forty-nine (49) percent of all HSA/HDHP enrollees in the individual market (including dependents covered under family plans) were age 40 or over; 51 percent were under age 40.
- States with the highest *percentage* of HSA/HDHP enrollees among their under-65 populations with private health insurance were: Minnesota (14.9 percent); Vermont (11.4 percent); Colorado (11.3 percent); Montana (10.8 percent); Ohio (10.6 percent); and Indiana (10.6 percent).
- States with the highest *levels* of HSA/HDHP enrollment were: California (1,073,319); Texas (844,832); Ohio (728,868); Illinois (690,509); and Florida (656,243).

Coverage options:

- Overall, preferred provider organization (PPO) products (92 percent) were the most popular product types.
- HSA/HDHP plans accounted for 10 percent of all new health insurance purchases in January 2011.
- Over 85 percent of responding companies reported offering online member access to HSA account information, health education information, physician-specific information, and personal health records as consumer decision support tools for their members.

INTRODUCTION

Health savings account (HSA) plans give consumers incentives to manage their own health care costs by coupling a tax-favored savings account used to pay medical expenses with a high-deductible health plan (HDHP) that meets certain requirements for deductibles and out-of-pocket expense limits.¹ Most HDHPs cover preventive care services (e.g., routine medical exams, immunizations, well-baby visits) without requiring enrollees to first meet the deductible.² The funds in the HSA are owned by the individual and may be rolled over from year to year.

HSAs were authorized by the Medicare Prescription Drug Improvement and Modernization Act of 2003 and entered the market in January 2004. Since then, AHIP has conducted an annual census of health insurance plans to monitor and report on the HSA/HDHP health insurance market. Virtually all health insurance plans

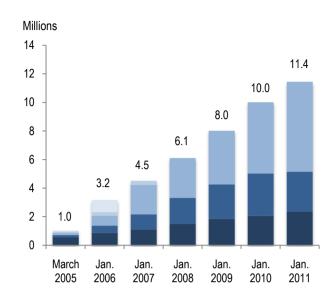

Figure 1. Growth of HSA/HDHP Enrollment, March 2005 to January 2011

■ Individual ■ Small-Group ■ Large-Group ■ Other Group ■ Other

Sources: AHIP Center for Policy and Research, 2005–2011 HSA/HDHP Census Reports.

Note: For this census, companies reported enrollment in the large- and small-group markets according to their internal reporting standards, or by state-specific requirements for each state. The "other group" category contains enrollment data for companies that could not break down their group membership into large- and small-group categories within the deadline for reporting. The "other" category was necessary to accommodate companies that were able to provide information on the total number of people covered by HSA/HDHP policies but were not able to provide a breakdown by market category within the deadline for reporting.

in the U.S. that sell HSA/HDHP products participated in this census.

Importantly, the census does not track participation in health reimbursement arrangement (HRA) products, which have features similar to HSAs and are offered by many large employers.

For this census, 83 health insurance companies and their subsidiaries reported coverage in HSA/HDHP products. Seventy-three (73) of these companies reported HSA/HDHP enrollment in the individual market; 72 companies had HSA/HDHP enrollment in the small-group market; and 70 companies had enrollment in the large-group market.

¹ For 2011, the minimum annual deductible for self-only HSA/HDHP coverage is \$1,200, and the maximum out-of-pocket limit is \$5,950. For family HSA/HDHP coverage, the minimum deductible is \$2,400, and the maximum out-of-pocket limit is \$11,900. These amounts are indexed annually for inflation.

Notes: Most enrollees in the 0-19 age group were dependents covered under family plans. Figures may not sum to 100 percent due to rounding.

For each market segment, premium data were collected by market segment based on the average premium of all product types. Previous HSA census reports based the reported premiums on the bestselling product.

Almost all responding companies were able to break out the number of lives covered by an HSA/HDHP by state. The percentage of those covered by HSA/HDHPs by state was calculated based on the total number of persons with private health insurance under age 65, by state, as reported by the U.S. Census Bureau's March 2010 Current Population Survey (CPS).

MARKET OVERVIEW

As of January 2011, 11.4 million people were covered by HSA/HDHP products. This represents an increase of 1.4 million since January 2010 and 3.4 million since January 2009 (see Figure 1 and Table 1).

Twenty-four (24) of the responding companies reported HSA/HDHP enrollment of more than 100,000 covered lives each, up from 21 companies in January 2010 (see Table 2). Forty-one (41) companies had HSA/HDHP enrollment of more than 25,000 covered lives in January 2011, 58 companies had enrollment above 10,000, and 69 companies reported HSA/HDHP enrollment of more than 5,000 covered lives in January 2010.³

Between January 2010 and January 2011, the fastest growing market for HSA/HDHP products was largegroup coverage. The large-group market represented approximately 55 percent all HSA/HDHP enrollment in January 2011, up from 50 percent of HSA/HDHP enrollment in January 2010 (see Figure 2). In the individual and large-group markets, approximately 95 percent of enrollees in HSA/HDHP plans were in PPO products. Approximately 80 percent of enrollees in small-group HSA/HDHP plans were in PPO plans. PPO plans have both in-network and out-of-network benefits, with lower co-payment or coinsurance requirements for in-network services. HSA/HDHP enrollees generally have access to negotiated discount arrangements with health care providers through their PPOs or other plan.

INDIVIDUAL MARKET

As of January 2011, 2.4 million people were covered by HSA/HDHPs purchased in the individual market. The gender distribution of enrollees covered by HSA eligible HDHPs in the individual market was 49.2 percent male and 50.8 percent female.

In January 2011, 48.8 percent of all HSA/HDHP enrollees in the individual market (including dependents covered under family plans) were age 40 or over; 51.2 percent were under age 40.

Specifically, 25.9 percent of enrollees were younger than 20 years of age; 25.4 percent were between the ages of 20 and 39; 18.6 percent were between the ages of 40 and 49; and 30.2 percent were 50 years of age or older (see Figure 3).

GROUP MARKET

As of January 2011, large-group coverage had increased to 6.3 million people, up from almost 5 million people in January 2010, and approximately 3.8 million in January 2009. In the large-group market, gender distribution of lives was 49.6 percent male and 50.4 percent female covered by an HSA/HDHP.

³ Results for responding companies are reported by grouping data from all subsidiaries into one unit, regardless of the number of subsidiaries or number of states where the company does business.

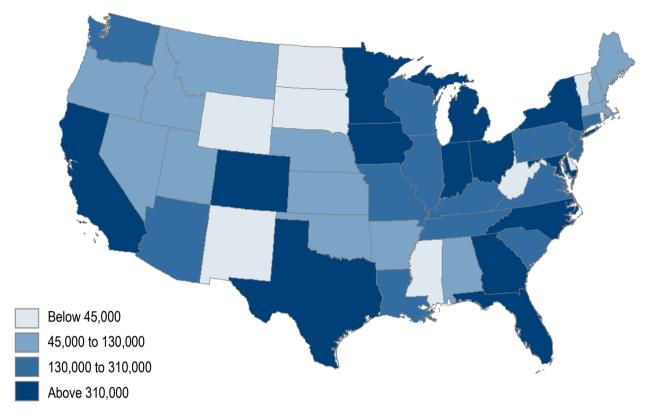

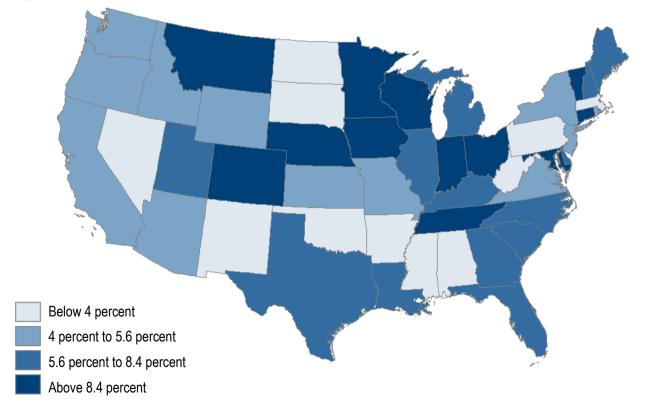

Figure 4. Number of Covered Lives Enrolled in HSA/HDHPs, by State, January 2011

Figure 5. Estimated Percent of Lives Under 65 Years with HSA/HDHP Coverage, by State, January 2011

Sources: AHIP Center for Policy and Research. U.S. Census Bureau.

Companies offering HSA/HDHP products in the small-group market reported enrollment of 2,779,208 as of January 2011, which is a decline from 2,970,000 in January 2010. The January 2010 enrollment figure was an increase from 2,429,000 in January 2009. In general, small-group coverage was defined as coverage through employers with 50 or fewer employees, although a handful of respondents to the census used a slightly different definition.⁴

Of all new health insurance enrollment in the small-group market (defined as new enrollment in the most recent full month or quarter), 13.5 percent was attributed to HSA/HDHP coverage. In the small-group market, gender distribution of lives covered by an HSA/HDHP was 52.3 percent male and 47.7 percent female.

STATE-BY-STATE ENROLLMENT

AHIP's census was able to collect state-by-state enrollment on nearly 11.2 million lives with HSA/HDHP coverage as of January 2011. States with the largest reported HSA/HDHP enrollment levels were: California (1,073,319); Texas (844,832); Ohio (728,868); Illinois (690,509); and Florida with 656,243 covered lives (see Table 3).

States with the highest percentage of HSA/HDHP enrollees among their under-65 populations with private health insurance were: Minnesota (14.9 percent); Vermont (11.4 percent); Colorado (11.3 percent); Montana (10.8 percent); Ohio (10.6 percent); and Indiana (10.6 percent).

Monthly premiums were reported for all markets combined: individual, small-group, and large-group. Monthly average premiums ranged from a high of \$481 for single coverage in West Virginia and \$1,263 for family coverage in Illinois, to a low of \$187 in Utah for single coverage and \$427 for family coverage in Iowa (see Table 4).
